

Understanding and Managing Human Error

Kathy H Abbott, PhD, FRAeS

Captain Robert Sumwalt

Prof. Scott Shappell

Federal Aviation
Administration

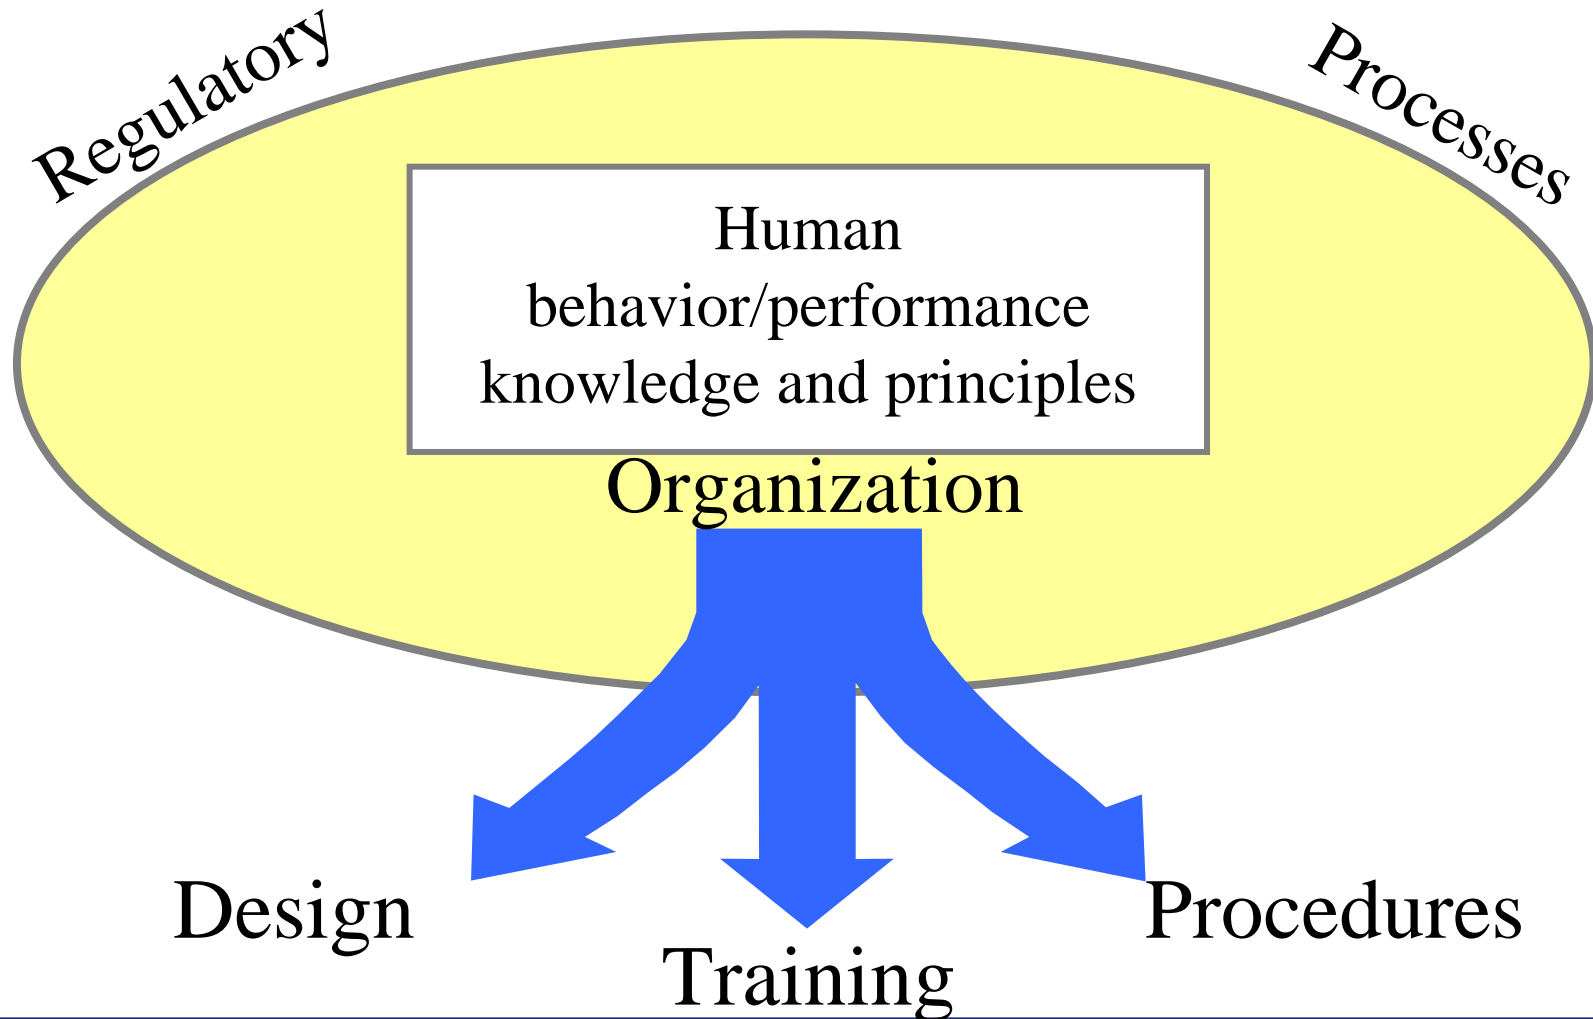

Overview of Tutorial

- **Human error – an overview**
- **Error and aviation safety**
- **Human Factors Analysis and Classification Scheme**
- **Threat and Error Management**
- **Regulation for design-related flight crew error**
- **Closing remarks**

Knowledge About Human Behavior & Performance

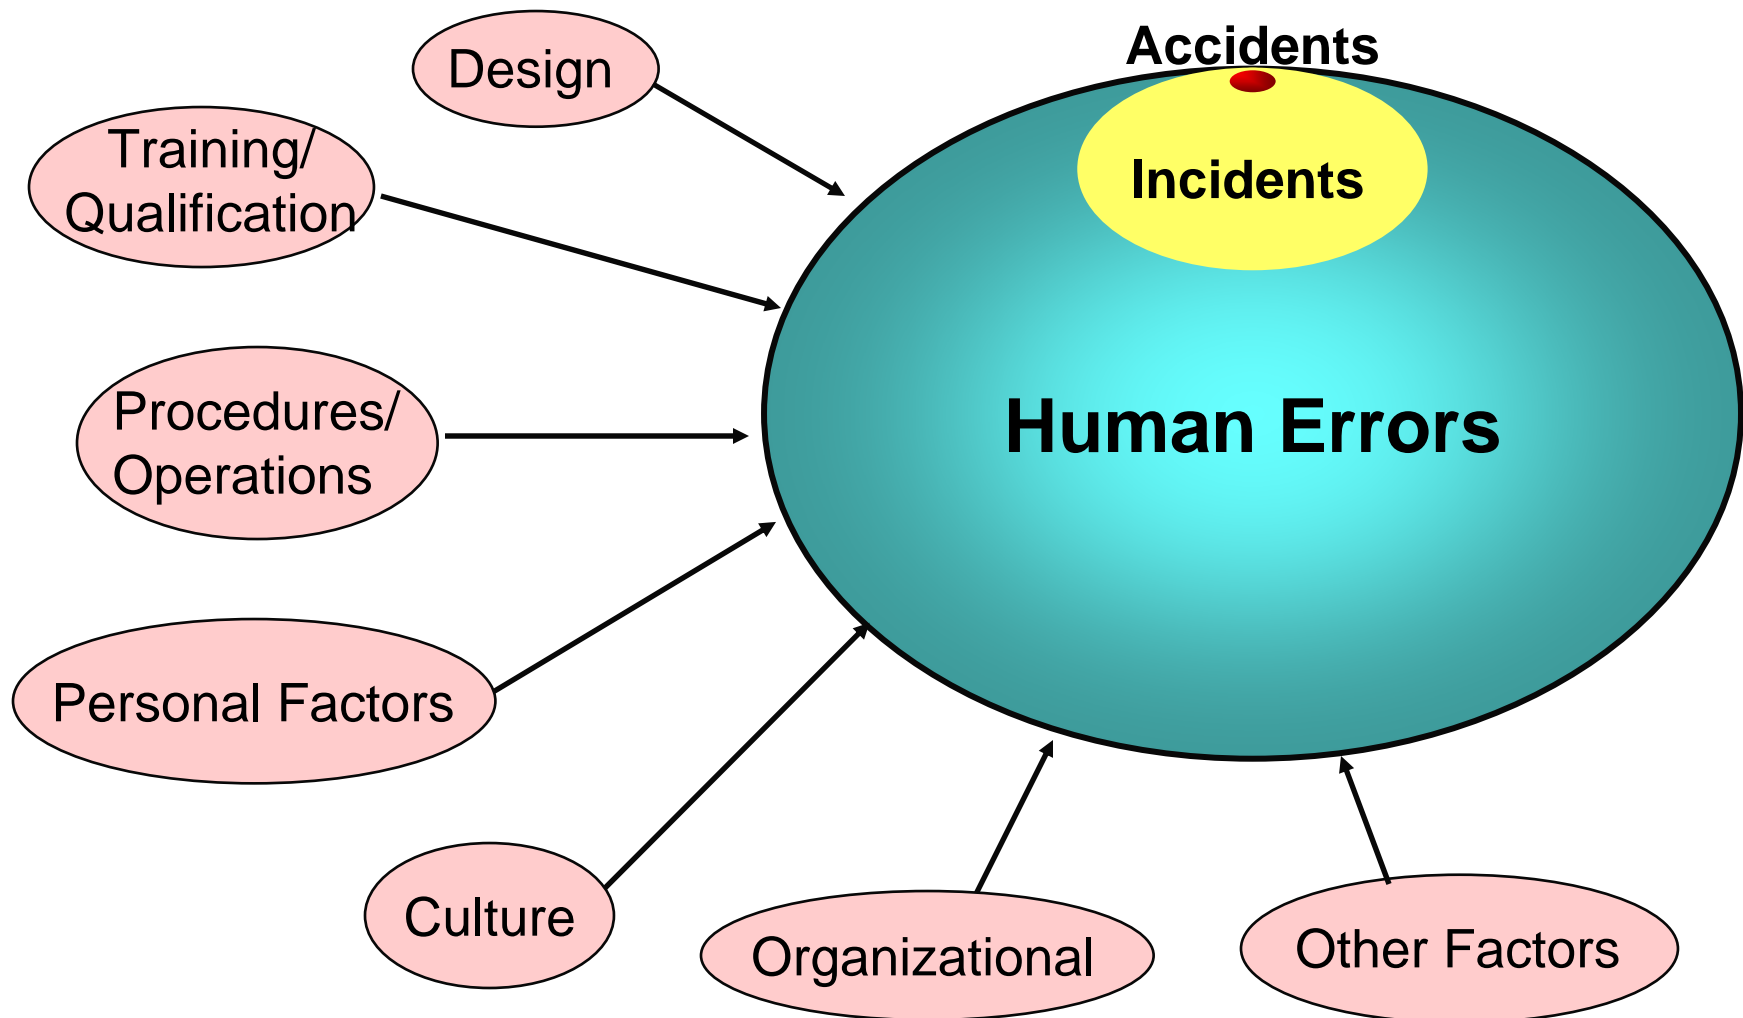

Perspective

- **Two thirds to three quarters of all accidents have human error cited as a primary factor**
- **Changes in technology fix some issues but may introduce new ones**

Many studies cite pilot errors as primary factors in a majority of accidents

To improve safety, ask *why* errors occurred

Reason's Swiss Cheese Model (2008)

Some holes due to active failures

Error Management

- **It is not possible to prevent all errors**
 - “Error is the down side of having a brain”
 - ”Learning does not occur without errors”
- **Experienced pilots make just as many errors as less experienced pilots *but:***
 - *they make different types of errors*
 - *they manage them differently*
- **The number of errors tends to decrease in more demanding situations but recovery from errors also decreases**
- **Error prevention, detection, and recovery**

Types of Errors – One Classification Scheme

- **Slips** - meant to do the right thing but incorrect action
- **Lapses** - omitted an item
- **Mistakes** - Intention was incorrect
- **Violations** - intentionally deviated from SOP or accepted procedure *note: not necessarily a legal violation*

HOLDING

Error-Provoking Factors

- **Hurry**
- **Primacy effect**
- **Inadequate feedback from systems**
- **Insufficient situation awareness**
- **Workload - low or high**
- **Mismatches in tasks**
- **Cognitive biases**
- **Organizational policies**
- **Non-standardized interfaces**

Error-Provoking Factors (continued)

- **Inconsistencies**
- **Distractions/interruptions**
- **Insufficient knowledge and skills**
- **Fatigue**
- **Something that differs from cultural norms**
- **Language issues**
- **Many others...**

Accident Rates by Years Following Introduction

Hull Loss and/or Fatal accidents - Worldwide Commercial Jet Fleet - 1959 through 2003
